

RIVO MULTITRADE OPTICAL SYSTEMS

Affordable prices for long-span cable trays

Overview

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

Long-span cable trays typically cost between \$2 and \$40 per meter or foot, depending on material, type, and installation complexity.

The cost of long-span cable trays varies widely based on material, design, and load capacity. Basic runs of wireways and cable trays are priced around \$8-15 per foot, while complex multi-level or heavy-duty configurations can range from \$25-40 per foot. On a per-meter basis, prices generally range from \$2 to \$25, with premium aluminum or stainless steel systems costing more due to superior corrosion resistance and durability.

Material-Based Pricing

- PVC or light-duty trays: \$2-5 per foot, suitable for low-load applications.
- Steel trays (galvanized or standard): \$4-15 per foot, commonly used in industrial and commercial settings.
- Aluminum premium systems: \$8-12 per foot, offering high corrosion resistance and long-term durability.

- Stainless steel or fireproof FRP trays: Higher-end options, often used in specialized or safety-critical installations .

B2B vs B2C Pricing

Bulk orders for industrial projects can significantly reduce per-unit costs. B2B suppliers, such as those on Alibaba, offer prices ranging from \$0.80 to over \$76 per unit, depending on size and material, while retail or small-scale consumer prices typically fall between \$15 and \$34 per unit . Large-span systems designed for heavy cable bundles and long runs may command higher prices due to fewer support points and higher load capacity .

Additional Cost Considerations

- Installation complexity: Multi-level or custom-shaped trays increase costs.
- Surface finish: Galvanized, powder-coated, or polished finishes add to the price.
- Shipping and handling: Bulk shipments or expedited delivery can affect the final cost .
- Accessories: Bends, connectors, covers, and branches may add to the overall project budget . In summary, when budgeting for long-span cable trays, expect a range of \$2–40 per meter or foot, with the final cost influenced by material, load requirements, installation complexity, and whether the purchase is bulk or retail. Selecting the appropriate tray type ensures both cost-effectiveness and long-term durability for industrial or commercial installations.
