Armored duct single-mode optical cable

Overview

Armoured cables are designed for improved mechanical and rodent protection in direct bury applications. Corning SST-Ribbon cables represent a truly innovative breakthrough in outside plant cable technology. Providing up to 216 fibers in a compact design, the enhanced coupling features ensure the ribbon stack and cable act as one unit, providing long-term reliability in aerial, duct and direct-buried. Hydrolysis resistant and special tube filling compound ensure a critical protection of fiber. A related GYTA type cable is also available. The rugged loose tube design offers reliable transmission performance over a long distance. This dry loose tube fiber cable comprises one to six sub-units, water-blocking yarn, dielectric strength material, an aramid ripcord, and a MDPE outer jacket. Each sub-unit consists of 12 colored glass fibers and water-swallowable yarn with an MDPE jacket that is 3mm in diameter.
