CIF Price of High-Frequency Switching Power Supply with Anti-Tracking Capacity Exported from the UAE

Overview

CIF Price of High-Frequency Switching Power Supply with Anti This paper presents a power supply using an increased switching frequency to minimize the size.

Key Takeaways

CIF prices for high-frequency switching power supplies from the UAE vary widely depending on power rating, manufacturer, and shipping terms, typically ranging from several hundred to a few thousand USD per unit. Product Overview

High-frequency switching power supplies (SMPS) with anti-tracking capacity are advanced devices that convert AC input to regulated DC output using high-frequency switching techniques. They are widely used in telecommunications, industrial systems, EV charging, UPS systems, and sensitive high-frequency equipment like RF amplifiers and radar systems (). Anti-tracking features enhance safety by preventing electrical tracking and arcing, making them suitable for high-reliability applications.

Factors Affecting CIF Price

- Power Rating and Output Voltage: Higher wattage or specialized output configurations increase the base cost ().
- Manufacturer and Brand: Premium brands or specialized manufacturers may charge higher prices. UAE suppliers often source from regional or international manufacturers ().

- **Shipping and Insurance:** CIF includes the cost of goods, freight to the destination port, and insurance. Shipping costs depend on weight, volume, and destination port.
- **Quantity and Bulk Orders:** Larger orders typically reduce per-unit CIF cost due to economies of scale.
- **Customs Duties and Tariffs:** Import duties at the destination country can affect the final landed cost.

Estimating CIF Price

- **Base Unit Price:** High-frequency SMPS units typically range from \$200 to \$2,000 USD per unit, depending on specifications ().
- **Freight and Insurance:** For small shipments, CIF can add 10–20% of the unit price; for bulk shipments, this percentage may be lower.
- **Example:** A 1 kW high-frequency SMPS priced at \$500 USD FOB UAE may have a CIF price of approximately \$550–\$600 USD to a major port in Europe or Asia, including insurance and freight.

How to Obtain Accurate CIF Pricing

- **Contact UAE Suppliers Directly:** Platforms like Alibaba () list UAE-based suppliers who can provide quotes including CIF terms.
- **Use Trade Data Platforms:** ImportGenius () and WITS () provide historical shipment data, including CIF values, for similar products exported from the UAE.
- **Request Freight Forwarder Quotes:** Shipping companies can calculate CIF based on weight, volume, and destination port.

Conclusion

While exact CIF prices vary, high-frequency switching power supplies with anti-tracking capacity exported from the UAE generally range from \$500 to \$2,500 USD per unit, depending on specifications, shipping, and insurance. For precise pricing, it is recommended to request quotes from UAE suppliers or consult trade databases for recent shipment data.
