

RIVO MULTITRADE OPTICAL SYSTEMS

Cable trays inside the ceiling

Overview

A ceiling cable tray is a support system mounted overhead. It suspends cables from a building's structure above the ceiling tiles. This organization facilitates efficient cable management and enhances overall safety within. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia. Combining local manufacture and distribution with an extensive product range, these facilities ensure we. Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings. The Ladder Tray features light, rugged, tubular steel construction. This system connects power and data directly to floor boxes and desk outlets.
