Color of busbar in distribution box

Overview

A busbar is an arrangement of horizontal metal plates, colored in three ways – red, yellow, and blue. It takes three-phase input and is received in the plates. The color regulations of switchgear mainly concern electrical safety and identification. Busbar color scale Three-phase AC busbar: Phase A is yellow, Phase B is green, and Phase C is red DC Bus: positive red, negative blue Simulates the logo color of the busbar Voltage Unit (kV) - Color AC 0. 23 -. A busbar is a metallic strip or bar (typically copper, brass or aluminium) that conducts electricity within a switchboard, distribution board, substation, battery bank, or other electrical apparatus to make a common connection between several circuits in a system.
