

RIVO MULTITRADE OPTICAL SYSTEMS

Complete List of Fiber Optic Connector Clamp Models

Overview

High quality cable management products that keep fiber cables' minimum bending radius to prevent fibers from being damaged.

Key Takeaways

Fiber optic connector clamps come in multiple types, including suspension clamps, tension clamps, wall-mount clamps, D-ring clamps, surface-mount clamps, T-clamps, and cable ties, each designed for specific installation environments and cable protection needs.

Suspension Clamps
Suspension clamps are primarily used in aerial ADSS and FTTH networks to support the cable at intermediate poles while allowing the natural catenary curve. They feature cushioned-jaw designs with high-durometer rubber inserts to prevent micro-bending and fiber damage, distributing the load evenly across the cable surface .

Tension Clamps / Dead-End Grips

Tension clamps, also known as dead-end grips or preformed tension clamps, are installed at span endpoints, road crossings, or directional changes. They transfer horizontal tension from the cable to the pole or tower structure, ensuring the cable remains secure under stress .

Wall-Mount Clamps

Wall-mount clamps are designed to attach fiber optic cables to walls or other surfaces. They are suitable for overhead cabling systems and come in various sizes to accommodate different cable diameters .

D-Ring Clamps

D-ring clamps feature a D-shaped bracket that hooks around the cable and locks in place with a screw or bolt. They are commonly used in ceilings or suspended locations, providing secure attachment without crimping the cable .

Surface-Mount Clamps

Surface-mount clamps attach directly to floors, walls, or equipment racks. They are ideal for confined spaces and offer a low-profile solution for securing fiber optic cables .

T-Clamps

T-clamps are used to secure cables to T-shaped brackets, often in outdoor applications such as telephone poles or aerial installations. They are designed to withstand high winds and vibrations .

Cable Ties

Cable ties are narrow clamps for smaller fiber optic cables, providing a quick and efficient method to secure cables in tight spaces. They are often used in data centers or indoor installations .

Materials and Construction

Fiber optic clamps are made from plastic, metal, or rubber, depending on the application and environmental requirements. High-quality clamps ensure minimal signal loss and long-term durability .

Specialized Accessories

Additional accessories include preformed helical rods for sheath protection, vibration dampers to prevent Aeolian vibration damage, and anchoring hardware for endpoint tension management . This list covers the main categories of fiber optic connector clamps used in telecommunications, FTTH, and aerial network deployments, providing engineers and installers with a reference for selecting the appropriate clamp for each application.

Comprehensive Guide to Fiber Optic Cable Clamps

Fiber optic cable clamps are devices used to secure and stabilize fiber optic cables in a wide range of applications,

Fiber Optic Cable Clamp

Why Choose Fibconet Tension Clamp Introducing Material of Fiber Optic Cable Tension Clamp Types of Drop Wire How to Install A Drop Wire Clamp? The tension Clamp for fiber cable is designed to fix and keep the tensile state fiber. Usually, the fiber laying around the electric transmission line or laying on the building is resistant and wears less than 50m. No special tools needed. It's reliable and sturdy, powerful and easy to use. It clamps and secures wires without stripping or removing ... See more on fibconet ME Fiber Optic

Fiber Optic Cable Clamp & Bracket

We supply various clamps and brackets for ADSS or drop cable install solutions. Cable clamp and bracket are very important factor

List of Fiber Optic Connectors Models & Products | TE Connectivity

Search our portfolio of Fiber Optic Connectors products and select your specifications. We offer a wide array of reliable and cost

Fiber Clamp & Brackets

The ADSS Suspension Guy Grip is a preformed helical product designed for suspending ADSS (All-Dielectric Self-Supporting)

Cable Ties, Clamps, Twist Locks for Fiber Cable Management

High quality cable management products that keep fiber cables' minimum bending radius to prevent fibers from being damaged. By

Fibre Optic Cable & Connector Guide

Proper selection of fibre optic cables and connectors for specific uses are becoming more and more important as fibre optic systems

Fiber Connector Types: A Comprehensive Guide 2025

A fiber optic connector is a mechanical device used to align and join optical fibers, enabling light to pass through with

Fiber Optic Cable Clamp & Bracket

MefiberOptic provide a complete solution of products for fiber optic cable deployment for FTTx network constructions. We supply

Fiber Connectors

Fiber Optic Connectors are used to connect two runs of fiber optic cable and consist of an adapter assembly along with two plugs.

Fiber Optic Cable Connectors: 10 Essential Powerful Facts 2025

Discover fiber optic cable connectors—types, uses, installation tips, and expert advice to boost your network's speed

Fiber Connectors

L-com's fiber optic offering includes popular fiber optic cables, fiber connectors, couplers, attenuators, splitters and termination

Optical fiber connector

Optical fiber connector LC (top) and ST (bottom) optical fiber connectors, both with protective caps in place An optical fiber connector

Fiber Optic Connector Identifier

Most fiber optic connectors are plugs or so-called male connectors with a protruding ferrule that holds the fibers and aligns fibers for

Fiber Optic Connectors Figure 1

Fiber-to-fiber interconnection can consist of a splice, a permanent connection, or a connector, which differs from the splice in its

Universal Cable Clamp

Model F-CC Cable Clamp is a convenient, general-purpose device that securely holds fiber cables and provides strain relief. The

Fiber Connectors

CommScope offers a variety of low-loss LC, SC, SN and MPO fiber optic connectors that deliver superior mechanical and optical

Fiber Optic Connectors

Fiber Optic Connectors Menu Whether you are installing a brand new fiber optic network or you are repairing a legacy system, using

Fiber Optic Connector Guide | Fiber Optic Connector Types

Find the fiber optic connector you need with help from this handy guide. Here we outline the various types of fiber optic connectors
