

Computer Room Cold Aisle NEMA4X Manufacturer

Overview

NEMA 4X (IP66) Cabinet Coolers are constructed of stainless steel for food service and other corrosive environments.

Key Takeaways

Leading manufacturers of Cold Aisle Containment systems compatible with NEMA 4X enclosures include EDP Europe, Vertiv, Maysteel, Armstrong, and Armagard. Key Manufacturers and Solutions

EDP Europe specializes in bespoke hot and cold aisle containment systems for data centers of all sizes. Their solutions are modular, scalable, and can be floor-standing or ceiling-suspended. EDP's Cold Aisle Containment (CAC) systems are designed to isolate cold air supply from hot exhaust, improving cooling efficiency and reducing thermal stress on equipment. They offer global support and turn-key installation services, making them suitable for both retrofit and new builds . Vertiv provides freestanding, rack-independent aisle containment systems adaptable to both hot and cold aisles. Their systems can be deployed before or after rack installation, simplifying installation and supporting a variety of cabinet heights. Vertiv products are backed by a 3-year warranty and are designed to integrate with existing fire suppression systems . Maysteel Industries manufactures DAMAC aisle containment systems and server racks in North America. Their solutions are customizable, cost-effective, and designed for efficient deployment. Maysteel emphasizes modularity, allowing integration with cable routing systems, overhead busways, and both hot and cold aisle configurations . Armstrong offers Cool Shield™ aisle containment solutions, including floor-mounted structures, framed panels, modular partitions, and containment doors. Their systems are designed for long-term performance, scalable data center builds, and efficient separation of hot and cold airflows. Armstrong emphasizes American-made reliability and premium-grade materials . Armagard produces NEMA 4X-rated enclosures suitable for harsh environments. Their enclosures are waterproof, dustproof, and corrosion-resistant, making them ideal for housing PCs, monitors, and small servers in industrial or computer room settings. Armagard enclosures are available in multiple sizes and configurations, including swing-out panels and dual-monitor cabinets .

Considerations for Selection

- **NEMA 4X Rating:** Ensures protection against water, dust, and corrosion, critical for industrial or high-humidity environments.
- **Modularity and Scalability:** Allows future expansion and integration with existing racks.
- **Turnkey Installation:** Some manufacturers provide full design, manufacturing, and installation services.
- **Compatibility:** Ensure the containment system integrates with your existing fire suppression, cabling, and cooling infrastructure. These manufacturers provide reliable, high-quality solutions for computer room cold aisle containment with NEMA 4X-rated enclosures, suitable for both new data centers and retrofits.
