

Construction of telecommunications towers in Ghana

Overview

The document outlines the guidelines set by the Government of Ghana for the deployment of communication towers, emphasizing the need for construction standards, permit requirements, and public safety. Telecommunication plays a crucial role in the modern society, and its importance in Ghana's rapid digital and economic transformation is very relevant. Ghana is however confronted with huge telecommunication towers dotted in the skylines of its major cities with some towers mounted in homes and on. Mobile phones and other ICT facilities are vital communication tools for both business and societal development. The growing demand for mobile services have necessitated the increase in communications infrastructure such as towers; which are needed to ensure that there are adequate network coverage. African Towers is a privately held “neutral host” provider of shared infrastructure sites to the telecommunications industry. We build, own, lease and manage 250+ telecommunications infrastructure sites in Ghana. High standard of professional competence, reliability and constantly offering fast satisfactory service to clients. It introduces a one-stop-shop mechanism to streamline the permitting process and addresses.
