Distribution box grounding box accessories

Overview

A link box is typically used to connect and distribute power to multiple devices or equipment in a system.

Key Takeaways

Grounding components such as grounding bars, grounding terminals, and bonding accessories are used to connect enclosure-mounted devices to earth ground. This reduces the risk of electrical shock, minimizes equipment damage, and helps prevent fire hazards. Copper -plated ground rods, copper ground rods, hot -dip galvanized grounding rods, stainless steel grounding rods, grounding rod clips, ground connectors, electrolytic ion ground pole, indoor welding, copper bag steel connecting ground wire, lightning needle, copper aluminum wiring terminal, etc. All Rights Reserved Power from factory ground must be installed by a qualified electrician. Each DISTRIBUTION BOX and controller must be grounded. The product range includes busbars, wiring bridges in various lengths, and protective ground and neutral conductor terminals. Screw connection with nut, contents: 2 pcs.
