Electrical cabinet wiring price

Overview

Estimate your electrical wiring costs with our free calculator. Get a detailed breakdown for materials, labor, and permits.

Key Takeaways

The cost to wire an electrical cabinet typically ranges from \$300 to \$2,500 or more, depending on materials, labor, and project complexity.

Cost Breakdown

Materials: For a standard panel upgrade, materials may include the panel itself (\$300), breakers (\$150), wiring (\$200), and miscellaneous items (\$50), with an additional 5–10% for waste or unusable materials .

Labor: Labor costs vary by region and complexity. A typical panel swap can take 8–12 hours, with journeyman electricians charging around \$35/hour plus 30% for taxes and benefits, resulting in a loaded rate of approximately \$45.50/hour. For a 12-hour job, labor totals about \$546 .

Nationally, electrician contractor rates can be 2–3 times the employee wage, with regional adjustments (e.g., San Francisco 165% of national average, rural Midwest 75%), .

Installation Costs: Wiring runs for a cabinet or panel typically cost \$302–\$365 per run, depending on site conditions, accessibility, and materials . Adding outlets or circuits increases costs incrementally, with per-outlet wiring ranging from \$100–\$185 and full-room wiring from \$800–\$2,500 .

Overhead and Profit: Contractors usually add 15–30% for overhead (tools, truck, insurance) and 10–20% for profit, resulting in a total markup of 25–50% on the combined materials and labor .

Factors Affecting Price

- **Project Size:** Larger panels or multiple circuits increase material and labor costs.

- **Accessibility:** Hard-to-reach cabinets or finished walls requiring wire fishing raise labor time.
- **Material Quality:** Premium panels, breakers, or specialized wiring increase costs.
- **Regional Labor Rates:** Urban areas with high demand have higher rates than rural locations.
- **Complexity:** Custom configurations, safety upgrades, or code compliance work can add to the total.

Example Estimate

For a 200A residential panel upgrade:

- **Materials:** \$700-\$800
- **Labor:** \$500-\$600
- **Overhead & Profit:** \$300-\$400
- **Total Estimated Cost:** \$1,500-\$1,800 For precise pricing, it is recommended to request itemized quotes from licensed electricians in your area, as actual costs vary based on local labor rates, material choices, and project specifics .
