Height of wire outlet in distribution box

Overview

Electricians typically install the receptacle box so that the bottom of the box is about 12 inches above the finished floor surface. When accounting for the height of the box itself, this placement results in the center of the outlet being positioned at approximately 15 to 16 inches. While the National Electrical Code (NEC) doesn't specify a mandatory standard outlet height for most general-use receptacles, established industry best practices and accessibility laws provide clear guidance. It takes the incoming power and safely distributes it to different circuits throughout your building. However, the key to.
