

How many kilometers is Samoa

Overview

Samoa: country data and statistics Samoa is an island state in the pacific ocean. The land has a total area of 2,840 km² (1,097 mi²) and a total coastline.

Key Takeaways

Samoa covers approximately 2,831–2,842 square kilometers of land.

Samoa is an island nation in the South Pacific Ocean, consisting of two main islands, Savai'i and Upolu, along with several smaller islands, totaling a land area of about 2,831–2,842 km² and a coastline of 403 km . The country stretches roughly 68 km from north to south and 148 km from east to west . Its terrain includes narrow coastal plains and volcanic, rugged mountains, with the highest peak being Mount Silisili at 1,858 meters . Samoa has no land borders with other countries, and its maritime claims include a territorial sea of 12 nautical miles and an exclusive economic zone of 200 nautical miles . The islands are located about 64 km west of American Samoa and several hundred kilometers from neighboring Pacific nations such as Tonga, Fiji, and Tuvalu . In summary, Samoa is a relatively small island nation with a compact land area, significant coastline, and mountainous interior, making it comparable in size to U.S. states like Rhode Island .
