How many types of cabinets are there

Overview

The Complete Guide: Types Of Cabinets Learn about the different types of cabinets with this comprehensive guide. From kitchen 13 Types of Kitchen Cabinets.

Key Takeaways

Cabinets come in various types based on function, style, and customization, including base, wall, tall, specialty, stock, semi-stock, and custom cabinets. Cabinet Types by Function

- Base Cabinets: Positioned on the floor at 36 inches high, these provide storage below and countertop workspace above. Variants include sink bases and corner bases to accommodate specific kitchen layouts .
- Wall Cabinets: Mounted 18 inches above countertops, typically 12-17 inches deep, they store plates, glassware, and frequently used items .
- Tall Cabinets: Also called pantry cabinets, these reach the ceiling and store large food items or small appliances .
- Specialty Cabinets: Include hutches, wine racks, appliance units, and pull-out organizers for unique storage needs .

Cabinet Types by Customization

- Stock Cabinets: Pre-manufactured in standard sizes and colors, ready to ship, and usually the most affordable option .
- Semi-Stock (Semi-Custom) Cabinets: Offer more size, finish, and configuration options than stock cabinets, allowing some customization at a moderate cost .

- Custom Cabinets: Fully tailored to your space, layout, and design preferences, offering endless options but at a higher price point .

Cabinet Styles

- Shaker: Flat center panel with squared edges, simple, timeless, and easy to clean .
- Raised Panel: More decorative with textured panels, adding elegance and depth to the kitchen .
- Inset: Doors fit flush within the cabinet frame for a seamless, high-end look .
- Slab/Flat-Front: Smooth, minimalist doors for modern kitchens .
- Beadboard: Vertical grooves for a cottage or traditional style .
- Glass-Front: Doors with glass panels to display items .
- Floating/Open Cabinets: Wall-mounted without a base, creating an airy, contemporary feel .

Construction Methods

- Framed Cabinets: Feature a solid wood face frame on the front, traditional and sturdy .
- Frameless (Euro-Style) Cabinets: No front frame, offering more accessible storage and a modern appearance .

Materials and Finishes

Cabinets are commonly made from plywood, particleboard, or MDF, with finishes ranging from matte, glossy, painted, or stained surfaces. Material choice affects durability, cost, and aesthetic appeal .

Summary

Choosing the right cabinet involves considering function, style, customization, and budget. Base, wall, tall, and specialty cabinets address storage needs, while stock, semi-stock, and custom options provide varying levels of flexibility. Styles like Shaker, raised-panel, and inset influence the kitchen's visual appeal, and construction methods determine durability and accessibility. Understanding these types ensures a functional and visually cohesive kitchen or storage space .
