## How much does fiber optic cable and router cost in total

### Overview

#### How Much Does Fiber Optic Cable Installation Cost?

[2026 Data] Discover the average fiber optic cable installation cost, including key factors that impact.

### Key Takeaways

For a typical home setup, expect to pay between \$1,500 and \$5,500 for fiber optic cable installation plus \$100 to \$500 for a router, totaling roughly \$1,600 to \$6,000.

#### Fiber Optic Cable Costs

The cost of fiber optic cable depends on type, length, and installation method:

- Material cost: \$1 to \$6 per linear foot for retail purchases, with single-mode fiber generally cheaper than multimode . Bulk purchases can reduce costs to \$0.09-\$1.52 per foot .
- Installation cost: For a home, fiber optic installation typically ranges from \$1,000 to \$5,000, with an average around \$2,000-\$3,500 for standard setups . Factors affecting cost include cable length, indoor routing complexity, aerial vs underground installation, and permit fees .

- Additional fees: Permits (\$50-\$500), site preparation, and restoration work may add to the total .

#### Router Costs

- Basic routers: \$100-\$200 for standard home use .
- Advanced routers: \$300-\$500 for Wi-Fi 6, mesh systems, or high-performance models .
- Installation: Many routers are self-installable, but professional setup may cost \$50-\$100 per hour if needed .

#### Estimated Total

Combining fiber optic installation and router purchase:

| Component                        | Low-End | High-End        |
|----------------------------------|---------|-----------------|
| Fiber optic cable + installation | \$1,500 | \$5,000         |
| Router                           | \$100   | \$500           |
| Total                            | \$1,600 | \$5,500-\$6,000 |

Notes

- Costs vary by region, property layout, and fiber type.
- Choosing a higher-end router or complex fiber installation (multi-story home, long runs, underground trenching) will push the total toward the upper end.
- Some ISPs include basic routers in service plans, which can reduce upfront costs.

This estimate provides a realistic range for budgeting a home fiber optic network with a router.
