Is the network cabinet disassembled What is the price

Overview

Amazon.com: Jingchengmei 1U Disassembled Vented Cantilever Compatible with all 19" racks and cabinets to hold various IT, network and other equipment. 1U 1.

Key Takeaways

Many network cabinets are sold disassembled (flat-pack) to save on shipping and storage, with prices ranging from around \$100 to over \$3,000 depending on type and features. Disassembled Network Cabinets

Network cabinets are often disassembled or flat-packed to reduce packaging volume, making them easier and cheaper to transport and store. For example, Gcabling wall-mounted cabinets come in a disassembled form and can be assembled in about 5 minutes using the included manual and positioning template, ensuring a stable final structure while protecting installers from injury during cable routing . Similarly, wholesale suppliers on Alibaba offer a wide range of disassembled network cabinets suitable for servers, networking equipment, and home or professional setups . Disassembled cabinets are available in various sizes, including wall-mounted, half racks, and full server racks, and can be designed for indoor or outdoor use.

Price Range

The cost of network cabinets varies widely based on size, material, and intended use:

- Basic wall-mounted units: Around \$100–\$300, suitable for small home offices or limited equipment .
- Mid-range cabinets: Typically \$300–\$1,000, offering more space, ventilation, and security features.
- Specialized or outdoor cabinets: Can exceed \$3,000, designed for large data centers or harsh environments . Factors affecting price include cabinet size (measured in U units), material quality (steel, aluminum, or wood), ventilation, lockable doors, and additional features like wheels or cable management.

Summary

If you are looking for a disassembled network cabinet, you can find options that are easy to assemble, cost-effective, and suitable for both home and professional use. Prices start as low as \$100 for small wall-mounted units and can go over \$3,000 for large, specialized cabinets. Choosing the right cabinet depends on your equipment size, installation space, and budget .
