

RIVO MULTITRADE OPTICAL SYSTEMS

Manufacturer of plug-in process electrical distribution boxes

Overview

Electrical Distribution Boxes for Power Distribution From power and signal distribution to I&C applications and complete room solutions - we have just what.

Key Takeaways

Leading manufacturers of plug-in electrical distribution boxes include Wieland, ZCEBOX, Yueqing Beigang, and PHLTD Electric, offering modular, certified, and customizable solutions for industrial and commercial applications. Key Manufacturers

1. Wieland Electric Wieland specializes in pluggable and decentralized electrical installation solutions, including distribution boxes for power, signal, and I&C applications. Their products are designed for smart buildings and harsh environments, offering flexibility, ventilation options, and compliance with IEC 61439 and IEC 61535 standards. Wieland provides robust housings suitable for high-demand applications, with options for energy, data, or combined distribution points . 2. ZCEBOX ZCEBOX is a global manufacturer of low-voltage electrical products, including distribution boxes, junction boxes, MCBs, and consumer units. They offer OEM and ODM services, with ISO9001 certification and CE, ROHS, IK, and HF approvals. Their products are suitable for large-scale production and customized solutions, providing high-quality, factory-direct electrical distribution boxes for industrial and commercial use . 3. Yueqing Beigang Industrial Socket Distribution Box This manufacturer produces plug-in distribution boxes with built-in circuit breakers, designed for convenience, safety, and reliability. Their products are adaptable to various environments, including indoor, outdoor, dry, and waterproof conditions. They also offer options for power indicators and voltage/current displays, enhancing operational safety and monitoring . 4. PHLTD Electric PHLTD Electric focuses on intelligent and efficient electrical solutions, offering plastic and stainless steel distribution boxes, waterproof boxes, industrial plug and socket boxes, and stage lighting distribution solutions. They provide customized OEM/ODM services, ensuring compliance with international quality standards and suitability for building electrics, industrial automation, telecommunication, and energy management .

Considerations for Selection

- **Certifications:** Ensure compliance with ISO9001, CE, ROHS, and relevant IEC standards.
- **Environment:** Choose boxes rated for indoor/outdoor use, moisture resistance, and temperature adaptability.
- **Modularity:** Look for plug-in or modular designs for easy installation, maintenance, and expansion.
- **Customization:** OEM/ODM services allow tailoring of distribution boxes to specific project requirements. These manufacturers provide a range of high-quality, plug-in electrical distribution boxes suitable for industrial, commercial, and smart building applications, with options for customization, safety, and environmental adaptability.
