Method for straight-connecting cable tray tees

Overview

Splice plates are the most widely used method for connecting cable tray sections in straight runs. We fix them with nuts and bolts through the holes in the plate and the tray sides. No connection compone using a screwdriver. Choosing the right one depends on project conditions, load. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. When a wire cable tray is cut, the fact that a. Covers for cable trays are available without fastening material or with pre-mounted turn buckles. Covers are available for 45° and 90° bends, angle-adjustable bends, T pieces, add-on tees and cross-overs. Depending on the version, the fitting cover is mounted on the cable tray with turn buckles. We have more than a decade's worth of experience making and designing quality cable tray and cable management systems.
