

NAT Industrial Switches

Overview

NAT switches Switches with NAT routing function combine switching and routing in a single DIN rail device. With Network Address Translation, they allow easy connection to the higher-level network for machines or systems with the same IP address range. The ports of the NAT switch can be freely. The NAT-102 Series is an industrial NAT device that is designed to simplify the IP configuration of machines in existing network infrastructure in factory automation environments. The NAT-102 Series provides complete NAT functionality to adapt your machines to specific network scenarios without. This website uses cookies and similar technologies (hereinafter "cookies").
