

RIVO MULTITRADE OPTICAL SYSTEMS

Plug and play fiber optic cable

Overview

In 1991 Rosenberger OSI already introduced high fibre factory assembled fibre optic trunk cables to the market.

Key Takeaways

Plug and play fiber optic cables are pre-terminated, ready-to-use fiber assemblies that simplify installation, reduce errors, and ensure high-performance connectivity.

Overview

Plug and play fiber optic cables, also known as pre-terminated fiber assemblies, come with connectors already installed at both ends, eliminating the need for field splicing or on-site termination . These cables are factory-tested for performance, ensuring low-loss, reliable connections suitable for high-speed data, video, and audio transmission . They are widely used in data centers, FTTH/FTTx networks, enterprise environments, and industrial applications where rapid deployment and consistent performance are critical .

Key Features

- Pre-terminated and tested: Connectors are installed in a controlled environment, reducing installation errors and downtime .
- Versatile configurations: Available in singlemode or multimode, with strand counts ranging from 2 to 288, and various jacket types for indoor, outdoor, or tactical use .
- Plug-and-play design: Enables fast, tool-free installation, often compatible with MPO, MTP, LC, SC, or OptiTap connectors .

- Durable and weatherproof: Many outdoor versions are IP68-rated, suitable for aerial, underground, or direct burial deployments .

- Customizable lengths: Factory-made to exact specifications, minimizing excess cable and reducing the need for additional splicing .

Advantages

- Time and cost savings: Reduces labor and installation time compared to traditional field-terminated fiber .

- High reliability: Factory testing ensures consistent optical performance and low-loss connections .

- Scalability: Modular designs allow easy expansion of networks and integration with existing infrastructure .

- Reduced skill requirements: Less reliance on specialized splicing technicians, making deployment faster and more efficient .

Applications

- Residential and commercial networks: For high-speed internet, smart home systems, and 4K/8K video delivery .

- FTTH/FTTx deployments: Quick connection to fiber access terminals and optical network terminals without splicing .

- Data centers and enterprise networks: Simplifies high-density cabling and ensures reliable connectivity .

- Industrial and harsh environments: Ruggedized cables for telecom, defense, offshore, and outdoor installations . Plug and play fiber optic cables provide a ready-to-use, high-performance solution that streamlines network deployment, reduces errors, and supports scalable, future-ready infrastructure. They are ideal for any scenario where speed, reliability, and ease of installation are priorities.

Pre-Terminated MPO & LC | Foss

We build Plug & Play solutions for demanding conditions in telecom, defense, offshore and industrial environments, based on high

Plug & Play™ Hardware | Preconnected Cable Systems | Corning

Plug & Play systems include factory-terminated system components which can be quickly mated to form an end-to-end optical link

Plug and Play Saves Time | Preconnected Cable Systems | Corning

One of the biggest issues facing data center and local area network designers is cable management in the racks and cabinets used

Plug & Play FO-cabling | high fiber & modular

In 1991 Rosenberger OSI already introduced high fibre factory assembled fibre optic trunk cables to the market. PreCONNECT

Pre-Terminated Fiber Optic Cables, Advantages, and Tips for Selection

Of these, the pre-terminated fiber optic assemblies have gained huge popularity and acceptance in recent years. They are a suitable

Fiber optic cable systems

General industrials Fiber optic cable systems Unique solutions for plug-and-play optical data communication in harsh environments

Plug and play fiber optic network cabling

Built with high-quality fiber optic cable and future-proof components designed to support critical data center links,

Multimode and Singlemode Fiber Optic Cables | Black Box®

Lower Total Cost Of Ownership Forget about expensive connectors, consumables, and equipment (f.e. fiber termination kits), plug

MT Plug-and-Play Cassette Modules

The cassettes simply snap in to any OCC fiber optic rack mount or wall mount cabinet and can be configured to meet any fiber optic

ETS OptiTap Pre-Terminated Fiber Optic Cable - 100 ft ...

ETS 100 ft OptiTap Pre-Terminated Fiber Optic Cable is a ready-to-use, plug-and-play solution for outdoor fiber networks. Designed

Pre Terminated Fiber Optic Cables | Custom Jackets & Connectors

Our pre-terminated Fiber Optic Cables offer a plug and play custom fiber solution for seamless installation in electrical conduits or

Pre-terminated FTTA Assemblies - Plug-and-Play Fiber Solutions

Factory-terminated FTTA assemblies with rugged connectors. Plug-and-play design for fast, reliable outdoor fiber deployment. OEM

Plug & Play FO-cabling | high fiber & modular

FO cabling high fiber and modular. Plug & Play system for data centers, office building & campus. Cost-effective solution for trunks
