Key Takeaways

Outdoor garden electrical distribution boxes typically cost between \$70 and \$450, depending on size, material, and weatherproof rating, with installation adding \$100–\$300.

Price Range for the Box

Outdoor electrical boxes designed for gardens or other exterior spaces are weatherproof and durable, often rated IP64 or higher to resist rain, dust, and UV exposure. The cost of the box itself generally ranges from \$70 to \$450, with smaller or simpler plastic models at the lower end and larger, metal, or highly weather-resistant units at the higher end . For example, the HEISSNER Garden Power Box, which is lockable, IP64-rated, and suitable for burying or concealing, is available from European retailers at a moderate price point .

Factors Affecting Cost

- **Material:** Plastic boxes are cheaper and lightweight, while metal boxes are more durable and resistant to impact, increasing the price .
- **Size and Capacity:** Larger boxes that can accommodate multiple outlets, cables, or power strips cost more.

- **Weatherproof Rating:** Higher IP ratings for water and dust resistance increase the cost.
- **Safety Features:** Lockable or child-safe designs add to the price.
- **Brand and Certification:** Products with recognized certifications or sustainable materials may be slightly more expensive .

Installation Costs

Installing an outdoor garden electrical box typically adds \$100-\$300 to the total cost, depending on the complexity of the wiring, conduit work, and outdoor access . Replacing an existing box is usually cheaper than a new installation because the wiring path is already established. Labor costs can sometimes exceed the cost of the box itself, especially for outdoor setups requiring weatherproofing and secure mounting.

Summary

For budgeting purposes, expect to spend \$70-\$450 for the box and \$100-\$300 for installation, with the final cost influenced by material, size, weatherproof rating, and installation complexity. Shopping online or at home improvement stores can provide a range of options to match your garden setup and safety requirements .
