Price of Assembled House Electrical Distribution Box

Overview

Cost of a New Electrical Box: Price Guide for U.S. Homes 2026 When planning a new electrical box installation or replacement, most buyers see price ranges i.

Key Takeaways

A complete household electrical distribution box assembly typically costs between \$1,200 and \$6,500, depending on panel size, amperage, installation complexity, and regional factors. Typical Cost Ranges

For a standard residential setup, the total cost—including the panel enclosure, breakers, wiring, labor, and permits—varies widely:

- Basic 100–125A indoor panel replacement: \$1,200–\$2,500, suitable for single-family homes with straightforward wiring and minimal rerouting .
- Mid-range 150–200A upgrade with minor relocation or additional circuits: \$2,250–\$5,000, including materials, labor, and permits .
- Premium 200–400A service with multiple subpanels, meter base relocation, or extensive rewiring: \$5,000–\$11,000, covering high-capacity systems and complex installations .

Factors Affecting Price

- Panel Amperage and Size: Higher amperage panels (200A or more) cost more due to larger enclosures, additional breakers, and higher-capacity wiring .

- Indoor vs Outdoor Installation: Weatherproof outdoor panels carry a premium over standard indoor units .
 - Labor and Installation Complexity: Labor rates vary regionally (\$60-\$120 per hour), and complex wiring, rerouting, or subpanel installation increases total cost .
 - Permits and Inspections: Local code compliance and required permits can add \$50-\$1,000 depending on project scope .
 - Additional Features: Smart monitoring, energy management, or integration with building systems can increase upfront costs but may offer long-term savings .
- Components Included

A complete household distribution box assembly generally includes:

- Main panel enclosure
- Circuit breakers for each branch circuit
- Wiring and bus bars
- Main disconnect switch
- Optional meter socket or subpanels
- Installation labor and permits

Summary

For a typical single-family home, homeowners can expect to pay \$1,200-\$2,500 for a basic 100-125A panel, \$2,250-\$5,000 for a mid-range upgrade, and \$5,000-\$11,000 for high-capacity or complex installations. Costs vary based on amperage, location, labor rates, and additional features, so obtaining multiple quotes from licensed electricians is recommended to ensure accurate budgeting .
