

Price of Electrical Separation Cable Trays

Overview

Cable Tray Dividers Cable Tray, Divider Strip, 2 Inch, COT30, For cable separation within a single tray. Cable Trays | McMaster-Carr Choose from our selecti.

Key Takeaways

Electrical separation cable trays typically range from £15 to £60 per 3-meter section, depending on material, type, and load capacity.

Electrical separation cable trays, also called tray dividers or segregation bars, are used to separate power and data cables within a shared tray system to reduce electromagnetic interference and comply with installation standards . Prices vary based on material, size, and design:

- **Material:** Pre-galvanised steel, stainless steel, or aluminium. Steel dividers are more durable and corrosion-resistant, suitable for industrial environments, while aluminium is lighter and often used in offices .
- **Dimensions:** Common dividers, such as a 30mm basket tray divider, are sold in 3-meter lengths and cost around £15-£25 per unit for standard pre-galvanised steel .
- **Tray Type:** Open wire baskets, solid or perforated trays, and Snap Track systems may influence cost. Snap Track dividers with patented push pins or field-fabricated options can be slightly higher due to specialized installation features .

- **Load and Duty Rating:** Light-duty trays for office or residential use are cheaper, while medium to heavy-duty trays for industrial or data center applications can cost £40–£60 per 3-meter section . Additional factors affecting price include bulk orders, custom lengths, and brand. Major brands like Unistrut, Legrand, and Unitrunk are compatible with most dividers, and trade or bulk pricing may reduce per-unit cost . When budgeting, also consider installation accessories such as brackets, screws, and connectors, which can add to the overall cost. For precise pricing, contacting suppliers directly or checking online catalogs is recommended, as prices fluctuate based on material, quantity, and delivery location.
