Price of cable trays for boxes

Overview

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

Cable trays typically range from \$0.80 to \$76 per unit depending on type, material, and purchase volume, while consumer-grade under-desk trays cost \$15-\$34. Pricing Overview

B2C Market (Consumer/Small-Scale Use):

- Cable trays for home offices or personal use are generally priced between \$15 and \$34 per unit.
- Wholesale prices for small-scale purchases can be as low as \$0.92, with potential markups of 300-400% for sellers.
- These products are designed for easy installation, often featuring no-drill clamps, and are suitable for decluttering workspaces or managing under-desk wiring . B2B Market (Industrial/Commercial Use):

- Bulk purchases for construction, data centers, or industrial facilities range from \$0.80 to over \$76 per unit, depending on material, size, and load capacity .
- Materials include stainless steel, galvanized steel, aluminum, and halogen-free plastics, with options for perforated, ladder, basket, trough, or single-rail designs .

- B2B pricing is lower per unit due to bulk orders and direct manufacturing, and ROI is higher for suppliers selling large volumes .

Factors Affecting Price

- Material: Stainless steel and aluminum trays are more expensive than plastic or zinc-coated steel due to durability and corrosion resistance .
- Design Type: Ladder trays, wire mesh trays, and basket trays vary in cost based on complexity and load-bearing capacity .
- Size and Length: Longer or wider trays designed to carry heavy cables cost more.
- Compliance and Standards: Products meeting DIN EN 61537, IEC, VDE, or NEC standards may have higher prices due to certification and quality assurance .
- Installation Features: Pre-drilled, modular, or easy-install systems can increase unit cost but reduce labor expenses.

Summary

- Consumer trays: \$15–\$34 per unit, easy to install, suitable for home or small office.
- Industrial/commercial trays: \$0.80–\$76 per unit, depending on material, type, and bulk purchase.
- Material and design significantly influence cost, with stainless steel and ladder-type trays being among the higher-priced options.
- Bulk purchasing reduces per-unit cost and is common in B2B applications for construction, data centers, and industrial facilities . Choosing the right cable tray depends on application, load requirements, environmental conditions, and budget, balancing upfront cost with long-term durability and compliance.
