

Price of mating fiber optic connectors

Overview

Industrial Fiber Optics, Inc. Industrial Fiber Optics, Inc. Home > All Products > Fiber Optic Connectors > mating Fiber Optic Adapters (Couplers), Ferrules.

Key Takeaways

Mating fiber optic connectors typically range from \$1 to \$20 per unit, depending on type, mode, and quality. Overview

Mating fiber optic connectors, also known as fiber optic adapters or mating sleeves, are used to connect two connectorized fibers with minimal signal loss. They come in various types such as SC, LC, ST, FC, and MTP, and can be single-mode or multimode. Hybrid adapters allow connections between different connector types.

Typical Price Ranges

- Standard single-mode or multimode adapters (SC-SC, LC-LC, ST-ST): \$1-\$5 per unit for basic models.
- High-precision or low-loss adapters designed for data centers or telecom applications: \$5-\$15 per unit.

- Hybrid adapters (connecting different connector types, e.g., SC to FC): \$5–\$20 per unit, depending on complexity and manufacturer . Prices can vary based on quantity purchased, brand, environmental resistance (dust-proof, waterproof), and shipping location. Suppliers like DigiKey, Mouser, Newport, and RS provide online catalogs where prices can be checked and orders placed for same-day shipping .

Factors Affecting Cost

- Connector Type: LC and MTP adapters are generally more expensive than SC or ST due to smaller ferrule size or higher channel density.
- Mode: Single-mode adapters often cost slightly more than multimode due to tighter alignment tolerances.
- Quality and Loss Specifications: Low insertion loss and high return loss adapters are priced higher.
- Quantity: Bulk purchases reduce per-unit cost. For precise pricing, it is recommended to check supplier websites like DigiKey or Mouser, where you can filter by connector type, mode, and quantity to get current unit prices .
