

Ranking of Australian Optical Cable Splicing Manufacturers

Overview

With over 30,000 products available from more than 50 leading brands - the team at AusOptic is more than happy to help.

Key Takeaways

Top Australian optical cable splicing manufacturers include Fotech, AFL, CABAC, Anderson Corporation, Norden Communication, and OSA Optical Solutions Australia, recognized for their expertise, certifications, and project delivery capabilities. Leading Manufacturers and Service Providers

1. Fotech Fotech specializes in fiber optic cable manufacturing, splicing, testing, and project delivery for major telecommunications networks in Australia. Their ISO certification and experience with large-scale projects make them a key player in precise and efficient optical network deployment . 2. AFL AFL provides a comprehensive range of fiber optic products, including fusion splicers, connectors, and testing equipment. Their 100S Fusion Splicer enhances productivity and ergonomics, supporting both new and experienced technicians in high-quality splicing operations . 3. CABAC Established in 1982, CABAC offers a wide range of cable joining systems, optical connectors, and splicing tools. Their ISO9001 accreditation and NATA-accredited laboratory ensure high-quality manufacturing and testing standards, making them a reliable choice for complex projects . 4. Anderson Corporation Pty Ltd Anderson Corporation manufactures high-quality indoor/outdoor multimode and singlemode fiber optic cables. They also provide specialized tools like fiber optic drop cable slitters, supporting efficient splicing and installation processes . 5. Norden Communication Norden Communication supplies ELV and optical solutions, including fiber optic cables and splicing systems. Their focus on advanced technology and innovative products positions them as a trusted provider for telecommunications and industrial projects . 6. OSA Optical Solutions Australia (OSA) Part of the Hexatronic group, OSA offers optical network solutions, including fiber optic splicing, network design, and maintenance. Their extensive inventory and R&D capabilities ensure future-proof and cost-effective infrastructure solutions .

Considerations for Selection

When choosing a manufacturer or splicing service provider, consider:

- Certifications and quality standards (ISO, NATA)
- Project experience with major carriers like Telstra, Optus, and NBN
- Technological capabilities such as advanced fusion splicers and testing equipment
- Service coverage across residential, commercial, and industrial projects These companies represent the most reputable and capable providers in Australia, offering a combination of manufacturing excellence, splicing expertise, and project delivery reliability .
