

Special tools for fiber optic cable installation Diagonal pliers

Overview

A diagonal cutting plier is a specialized cutting tool designed for precisely cutting various types of cables, including fiber optic cables. If you're just starting out, use this as a jumping off point to see how each tool works. Cutting edges are induction hardened. Unlike copper cabling, optical fiber requires precise handling, clean end faces, and accurate measurement to avoid signal loss and performance degradation. Combined with good craftsmanship the right tools give a precise result. The tool consists of a plier with replaceable knife trays ranging over five. CommScope features a family of tools and components for the installation, repair and maintenance of fiber cables, including prep and termination kits.
