

Switch optical fiber Somalia branch

Overview

Somalia Optical Switch Market (2025-2031) | Trends, Outlook & Forecast6Wresearch actively monitors the Somalia Optical Switch Market and publishes its comp.

Key Takeaways

Somalia's optical fiber network is expanding, with key providers like Somali Optical Network (SOON) and Dalkom Somalia offering domestic and international connectivity.Key Providers

Somali Optical Network (SOON) is a privately owned company licensed to provide telecommunications infrastructure in Somalia. It offers Fiber to the Home (FTTH), local loop capacity, data transit services, video broadcasting, and surveillance services. SOON also provides international interconnectivity for Somali operators and global carriers, and it leases dark fiber to telecom companies, supporting both local and international network expansion . Dalkom Somalia operates a seamless optical fiber network covering 30 African countries and extending to over 700 cities globally. It has invested in multiple submarine cables, including EASSy, EIG, and WACS, enabling cost-effective and resilient connectivity for Somali and international clients .

Government Initiatives

The National Communications Authority (NCA) is leading efforts to unify and expand Somalia's fiber infrastructure. Plans include a comprehensive regulatory framework for submarine cable landings and a unified fiber optic deployment policy. These measures aim to reduce deployment costs, improve network quality, and extend connectivity to underserved and rural areas, bridging the digital divide .

Network Expansion and Access

Currently, Somalia's domestic fiber networks are fragmented, with urban hubs like Mogadishu dominating connectivity. The government and private operators are working to expand fiber nationwide, ensuring equitable broadband access and fostering a cohesive digital ecosystem. This includes public consultations to align deployment strategies with the needs of telecom operators, private sector players, and international partners .

Summary

For anyone seeking optical fiber services in Somalia, SOON and Dalkom Somalia are the primary providers offering both domestic and international connectivity. The ongoing government initiatives aim to streamline fiber deployment, improve network quality, and expand access to rural areas, making Somalia's optical fiber infrastructure increasingly robust and accessible.
