

RIVO MULTITRADE OPTICAL SYSTEMS

Waterproof electrical distribution box for construction sites

Overview

For the big jobs. Dependable power for construction sites, warehouses and trade shows. Power 7 devices from a single 50A source.

Key Takeaways

Waterproof electrical distribution boxes for construction sites typically range from \$80 to \$300 per unit, depending on IP rating, number of sockets, and material quality. Typical Options and Pricing

- Compact 4-Socket IP67 Box
- Features: Four 230V/16A sockets, individual circuit breakers, IP67 waterproof housing, ABS plastic, wall-mountable, suitable for indoor/outdoor use .
- Price: Around €90–€120 per unit on Amazon for single units .
- IP65 Weatherproof 110V Box
- Features: High-current capacity (up to 60A), IP65 housing, independent circuit breakers with leakage protection, pre-wired for easy installation .
- Price: Approximately \$100–\$150 per unit depending on supplier and shipping .
- DIN Rail and Industrial-Grade Boxes
- Features: IP65–IP68 sealing, UV-stabilized ABS or polycarbonate housings, options for DIN rail mounting, suitable for solar, pumps, or industrial machinery .

- Price: Typically \$150-\$300, with custom or bulk orders potentially reducing per-unit cost .
- Custom or Sheet Metal Enclosures
- Features: IEC-compliant, thermoplastic or sheet steel housings, IP65-IP67, suitable for three-phase or high-power applications, pre-wired or modular .
- Price: Can range from \$200-\$400 depending on customization, number of sockets, and industrial standards .

Purchasing Considerations

- IP Rating: IP65 is sufficient for rain and dust, while IP67 offers full immersion protection. Choose based on site conditions.
- Number of Sockets and Current Rating: Match the box to the equipment load; 16A per socket is common for small tools, while 60A+ may be needed for heavy machinery.
- Material: ABS or polycarbonate is lightweight and UV-resistant; metal enclosures offer higher impact resistance.
- Bulk Orders: Suppliers often provide discounts for 50-100+ units, which can significantly reduce per-unit cost .
- Installation: Some boxes are pre-wired for quick setup, but professional installation is recommended for safety compliance. In summary, for a standard construction site, a waterproof 4-socket IP65-IP67 box costs roughly \$80-\$150, while larger or industrial-grade enclosures can reach \$300 or more, with bulk orders and customization affecting the final price .
