What to do if there is a cable tray on top of the rack

Overview

Often, a section of ladder-style raceway runs from the top of the rack to a plywood backboard or wall to provide a cable pathway and support for the rack. The raceway should be installed at about the same. For teams that need to replace damaged tray sections, add new runs, or improve an old system, the first step is understanding the full risk profile before touching the tray. Electrical Hazards The most serious cable tray safety issue is accidental contact with live electrical cables. It also offers future-ready ideas, troubleshooting guidance, and useful suggestions to guarantee your cable systems. The primary rulebook of cable tray systems is called NEC Article 392. It instructs us on how to construct them, where to locate them, and how to stuff them with wires without using too much. NEC section 300-8 does not permit any tube, pipe, or equal for water, air gas, drainage, steam, or any service other than electrical in raceways or cable trays containing. Ladder rack (also known as “ladder trays” or “cable ladders”) are one of the most common types of cable runway. Cables can enter and exit anywhere along the. When laying out an equipment room or telecommunications room, whether in an existing building or for new construction, designers generally specify electrical outlets to be placed 12 to 18 inches above the finished floor.
