Where is the quota for distribution boxes

Overview

Frequently Asked questions on Warehouse Quotas (Assembly Bill 701) AB 701 creates 13 new sections of the Labor Code regulating the use of quotas by “Warehou.

Key Takeaways

The quota for distribution boxes is typically managed through SAP quota arrangements or assigned at specific warehouse/distribution center locations.

SAP Quota Arrangement for Distribution Boxes

In SAP, quota arrangements are used to allocate materials or distribution boxes fairly among vendors, plants, or storage locations. This ensures that no single unit is overburdened and that inventory is distributed efficiently. To manage quotas in SAP S/4 HANA:

- Use the “Manage Quota Arrangements” Fiori app to define and monitor quotas for materials or distribution boxes.
- Prerequisites include procurement type, lot size, and source list.
- Quota arrangements can be linked to specific plants and storage locations, for example, Plant 1000 and Storage Location 1004, with assigned vendors for distribution .
- The Quota Arrangement Usage field can be enabled in the material master via transaction OMS9, allowing visibility and control over quota assignments .

This system allows logistics teams to track and adjust quotas dynamically, ensuring fair distribution across multiple warehouses or vendors.

Physical Distribution Locations

For companies like Amazon in the UK, distribution boxes are allocated to specific fulfillment centers. Active warehouse locations include:

- Manchester (MAN1, MAN2) – Great Sankey, Warrington WA5 3XA
- Dunstable (LTN4) – LU5 4GB
- Daventry (BHX3) – NN11 8QL
- Scotland (EDI4) – Dunfermline KY11 8ST
- Tilbury (LCY2) – London Distribution Park, RM18 7AN
- Doncaster (LBA1, LBA2) – DN4 5JS and DN11 0BG
- Skewen, Wales (CWL1) – Swansea SA1 8QX
- Brogborough (LTN1) – Bedfordshire MK43 0ZA .

These centers receive distribution boxes according to predefined quotas or inventory allocation plans, which may be influenced by sales demand, storage capacity, and shipping schedules.

Local Distribution Companies

In Manchester and surrounding areas, warehousing and distribution companies can also manage quotas for distribution boxes, providing services such as fulfillment, storage, and logistics support. Examples include:

- P & D Northern Steels – Royton, England
- Recontainers Direct – Haslingden, England
- MSL UK Ltd – eCommerce fulfillment and distribution
- Apex Logistics UK Ltd – Rochdale, England
- PRO3PL – Logistics and supply chain consulting .

These companies can act as intermediaries to manage quotas, ensuring that distribution boxes are allocated efficiently across multiple clients or retail locations.

Summary

The quota for distribution boxes can be managed both digitally and physically: SAP quota arrangements provide a structured system for allocation across plants, storage locations, and vendors, while physical distribution centers and third-party logistics companies implement these quotas in real-world operations. This combination ensures efficient, fair, and traceable distribution of inventory.
