

RIVO MULTITRADE OPTICAL SYSTEMS

Where to buy upgraded E2000 connectors

Overview

E-2000™ The E-2000™ connector is the most mechanically robust FO connector. Combined with R&M's quality requirements for raw E2000 Connectors International.

Key Takeaways

Upgraded E2000 connectors can be purchased from specialized fiber optic suppliers such as FO Center, Fiber-Life, sFiberOptic, HYC Co., and SENKO, offering single-mode, multi-mode, simplex, duplex, and enhanced versions with spring-loaded protective caps. Recommended Suppliers

- FO Center FO Center offers a wide range of E2000 connectors for both single-mode and multi-mode applications, featuring durable locking levers and compatible with SENKO E-2 series components. They provide fiber optic crimpsets for reliable termination and assembly of connectors .
- Fiber-Life Fiber-Life supplies E2000 connectors with low insertion loss, high compressive strength, and easy plug/unplug functionality. Their products are suitable for telecommunication networks, CATV, FTTX, and other optical applications .
- sFiberOptic sFiberOptic provides E2000 connectors with spring-loaded protective caps for enhanced safety and dust protection. They offer single-mode UPC, single-mode APC, and multi-mode UPC connectors, as well as simplex and duplex versions compliant with IEC 61754-15 standards .

- HYC Co., Ltd HYC designs and manufactures E2000 connectors with precise ceramic ferrules, low insertion loss (≤ 0.15 dB), and high durability for over 500–1000 mating cycles. Their connectors meet Telcordia GR 326, IEC 61300-2, RoHS, and other international standards, making them suitable for professional optical networks .
- SENKO SENKO offers E-2000 duplex adapters and connectors with spring-loaded shutters to protect ferrules from contamination. Their products are compatible with all industry-standard E-2000 connectors and are widely used in WANs, LANs, MSO, and industrial applications .

Tips for Purchasing

- Determine the type: Choose between single-mode or multi-mode, simplex or duplex, and UPC or APC polish depending on your network requirements.
- Check compatibility: Ensure connectors are compatible with existing adapters and assemblies.
- Consider enhanced features: Spring-loaded protective caps and low insertion loss designs improve performance and longevity.
- Verify standards compliance: Look for IEC, Telcordia, and RoHS certifications for reliability in professional networks. By sourcing from these suppliers, you can obtain high-quality upgraded E2000 connectors suitable for demanding optical network installations.
