

RIVO MULTITRADE OPTICAL SYSTEMS

Which company to choose for Chilean cable trays

Overview

Since 1982, VALDINOX has been designing and manufacturing wire mesh cable trays, supports, and easy-installation accessories.

Key Takeaways

For high-quality cable trays in Chile, Brilltech Engineers and Atkore International are among the top recommended suppliers, offering durable, compliant, and versatile solutions. Local Supplier: Brilltech Engineers

Brilltech Engineers is a well-known cable tray manufacturer and supplier in Chile, offering a wide range of trays made from galvanized steel, stainless steel, and fiberglass. Their products are designed for durability, safety, and efficient cable management, including perforated trays that enhance airflow and prevent overheating. They provide installation support, system design assistance, and compliance with industry standards, making them suitable for both small and large projects .

International Options

For projects requiring global standards or specialized solutions, Atkore International (Cope Cable Tray) is a leading manufacturer with a strong reputation for durable galvanized cable trays suitable for industrial, petrochemical, and power generation facilities. They offer a broad range of products, including ladder, perforated, and stainless steel trays, with extended warranties and compliance with UL, NEMA, and IEC standards . Other notable international suppliers include Eaton Corporation, Schneider Electric, and Legrand, which provide galvanized and climate-resistant cable trays for industrial and commercial applications. These companies are recognized for high-quality materials, robust design, and global compliance, making them reliable choices for projects in Chile .

Key Considerations

When choosing a cable tray supplier in Chile, consider the following:

- **Material and durability:** Ensure trays are suitable for local environmental conditions (humidity, coastal exposure, or industrial settings).
- **Compliance and standards:** Look for adherence to UL, NEMA, IEC, or local Chilean regulations.
- **Product variety:** Ladder, perforated, wire mesh, and FRP trays may be needed depending on your project.
- **Support services:** Installation guidance, system design, and after-sales support can reduce project risks.
- **Local availability:** Suppliers with a presence in Chile can provide faster delivery and easier logistics.

Recommendation

For most projects in Chile, Brilltech Engineers is ideal for local support and tailored solutions, while Atkore International and other global manufacturers like Eaton or Schneider Electric are excellent for high-standard industrial applications or projects requiring international compliance. Choosing between them depends on your project scale, environmental conditions, and compliance requirements .
