

Which manufacturer should I choose for trough-type cable trays

Overview

Cablofil steel trough trays provide the strength and security required when then need to limit cable access is of primary importance.

Key Takeaways

Top manufacturers of trough-type cable trays include Sanfeng Elec, Atkore International, JLH Electric, and Shilden Strut, offering durable, certified, and customizable solutions for industrial and commercial applications. Leading Manufacturers

Sanfeng Elec specializes in premium trough-type cable trays with U-shaped profiles, constructed from galvanized steel, stainless steel, or aluminum alloys. Their systems provide robust cable support, heat dissipation, modular installation, and compatibility with heavy-duty power and fiber optic cables, suitable for manufacturing facilities, data centers, and commercial buildings . Atkore International is a global leader in cable management systems, offering standard and custom roll-formed cable trays. They provide stainless steel and galvanized options, extended warranties, and support for international shipping, making them ideal for large-scale industrial and construction projects . JLH Electric (Shandong Taian Jinheng Electric Co., Ltd.) is a high-tech Chinese manufacturer with ISO 9001, ISO 14001, ISO 45001, and CE certifications. They produce cable trays, trunking, ladders, perforated trays, and wire mesh trays. Their factory spans 10,000 square meters and features advanced CNC, welding, and automated production lines, ensuring high quality, competitive pricing, and reliable delivery for global customers . Shilden Strut offers industrial-grade trough cable trays in carbon steel, stainless steel, and aluminum alloys. Their products feature anti-slip covers, perforated designs for heat dissipation, and compliance with IEC 61357 standards. They are suitable for automotive, automation, and construction applications, providing flexibility for both small and large-scale installations .

Key Considerations

- **Material and Durability:** Hot-dip galvanized, stainless steel (304/316), and aluminum alloys are preferred for corrosion resistance and long-term performance .
- **Certifications:** Look for ISO, CE, UL, cUL, and IEC certifications to ensure compliance with international safety and quality standards .
- **Customization and Modular Design:** Modular systems with ventilated bottoms, removable covers, and integrated grounding allow flexible installation and maintenance .
- **Global Availability:** Manufacturers like Atkore and JLH Electric provide international shipping and support, making them suitable for projects worldwide . For projects requiring high-quality, durable, and compliant trough-type cable trays, these manufacturers provide reliable options with a range of materials, certifications, and customization capabilities to meet industrial, commercial, and data center needs.
